

High Temperature Paint 400 ml (V400TEMP)

High Quality Enamel from the Ambro-Sol "Paint" line, this paint resists high temperature and is ideal for painting surfaces of ovens, stoves, grills, flues. It's ideal not only for products found at home but the steel industries, auto body repairman and forge industries.

HIGH TEMPERATURE ENAMEL – It is a high quality enamel with a modified silicone resin base, which allows you to renew all surfaces normally exposed to high temperatures. Heat resistant up to 300°C-700°C. Application: parts of heaters, stoves, ovens, chimney flues, barbecues, fire screens, motorcycle mufflers, etc. don't expose in direct contact with flames. Important: to obtain an optimal and long lasting result it is necessary for the painted parts to be exposed even if only once, to a temperature of at least 180°C; any less will make the hardening and adhesion of the enamel only partial. Clean carefully the surface before application and shake vigorously the can. After use, it's advisable to spray for 2/3 seconds with the spray upside down, to avoid the block of the nozzle.
